- Applies to many beyond maintenance workers

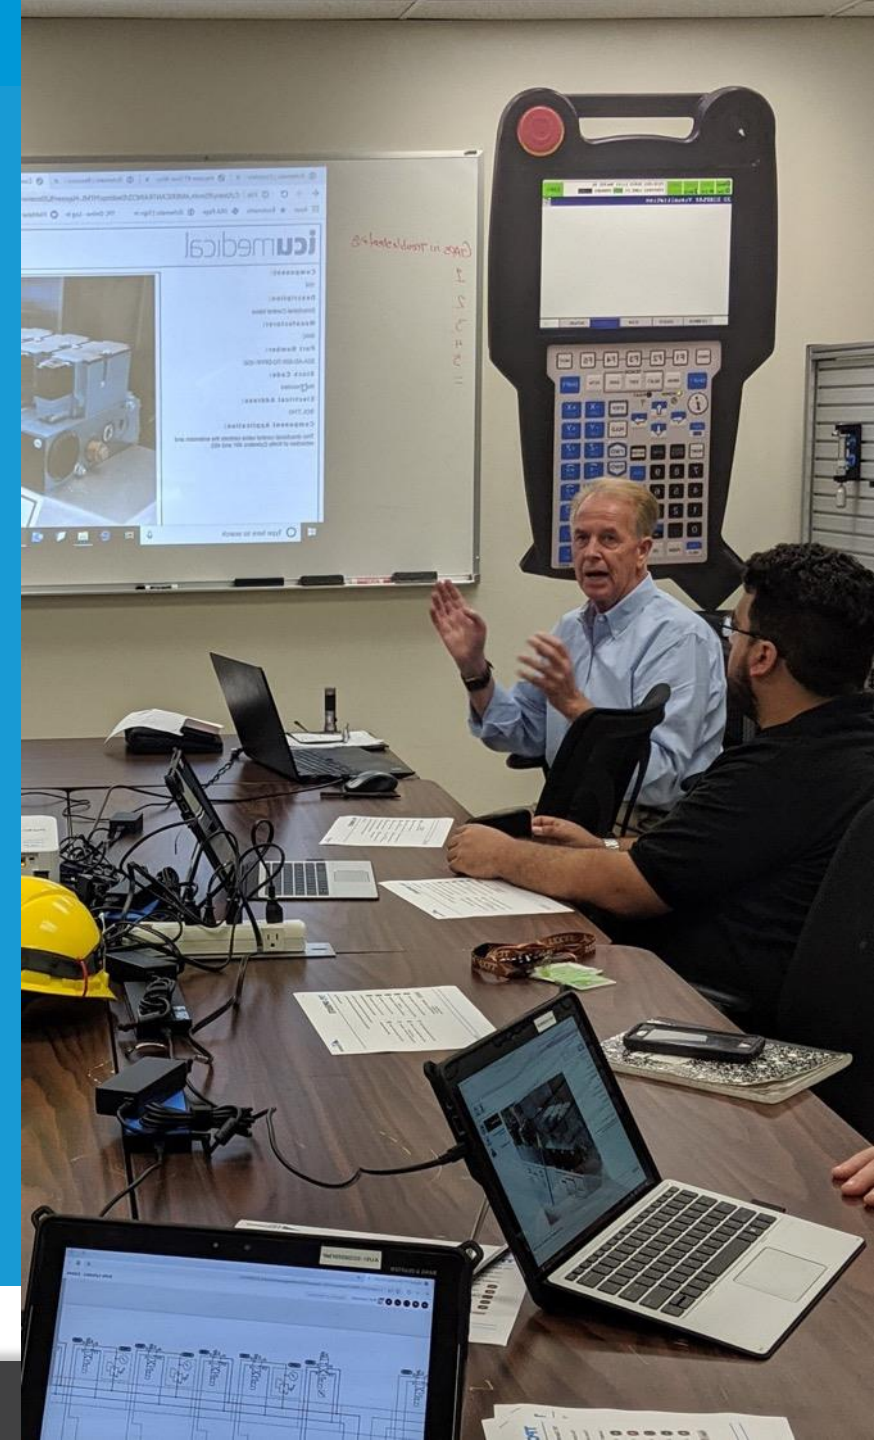

Instructor-Led Training

Bring training onsite to your facility that is customized to your facility's own needs and equipment

**Virtual* option for benefits of live instruction with the convenience & cost savings of online learning. Dynamic virtual classrooms w/personalized attention.

“ The training was excellent! Our employees learned a lot and we intend to take this valuable knowledge out into the field. I would highly recommend to other companies.

*Joel F., Field Service Supervisor
Western Energy Systems*

Simulation Library

Tackle costly equipment malfunctions quickly, accurately, and safely through our simulation-based troubleshooting training.

- Troubleshooting Electrical Circuits
- Troubleshooting Control Circuits
- Troubleshooting Motor Circuits

Activities include:

- Lockout/Tagout
- Using the Multimeter
- Measuring Workout
- Work with Wires
- Replace or Repair

Simulation Features

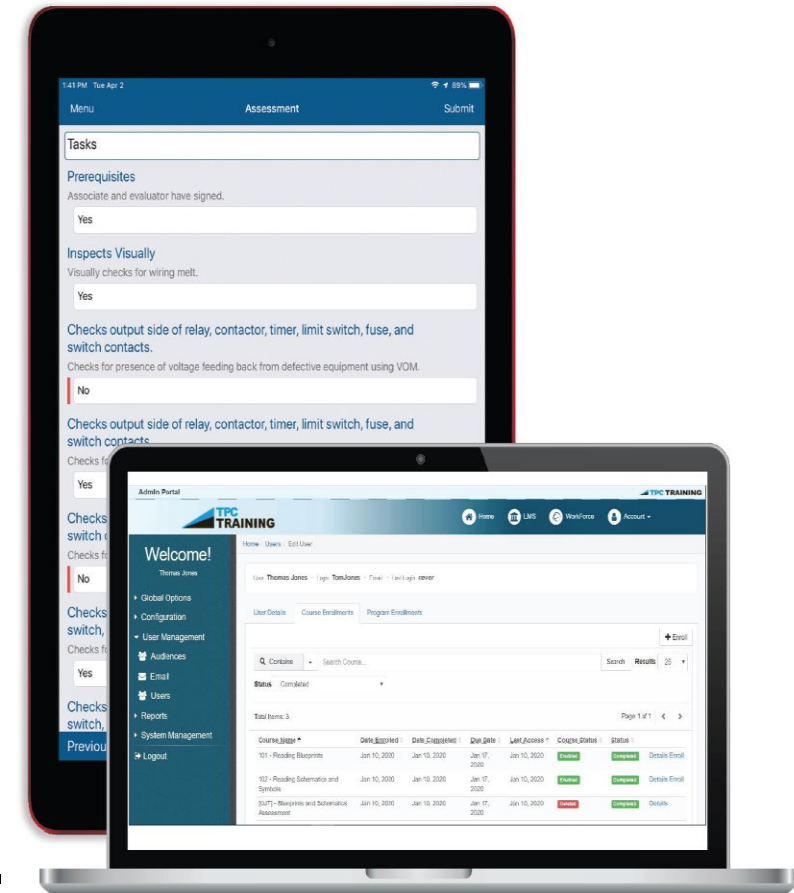

- Realistic lighting circuit scenario
- A variety of faults to explore and solve
- Elements typically found in electrical circuits
- Adaptive learning that assesses user's skill levels and customizes the program to the individual's performance
- Detailed experiential environment
- Conformance to NEMA standards

Mobile Forms: Skills Verification

The TPC Skills Verification System allows effortless tracking of all training in a robust Learning Management System. Easily validate training in the field with an online library of 57 On the-Job Training (OJT) assessments.

With Mobile OJT & Assessment Tools you can:

- Upload and annotate photos in real time
- Eliminate inefficient paper forms and reduce error rates
- Use online and offline
- Verification of skills and knowledge
- View submissions by object fields
- Verify employee and evaluator signature authority
- OJTs are available across multiple topic areas like: Electrical Maintenance
- Mechanical Maintenance
- Instrumentation and Control
- Machine Shop

Customized Training

Custom needs analysis and training program development customized to your workforce, equipment, facility, and goals

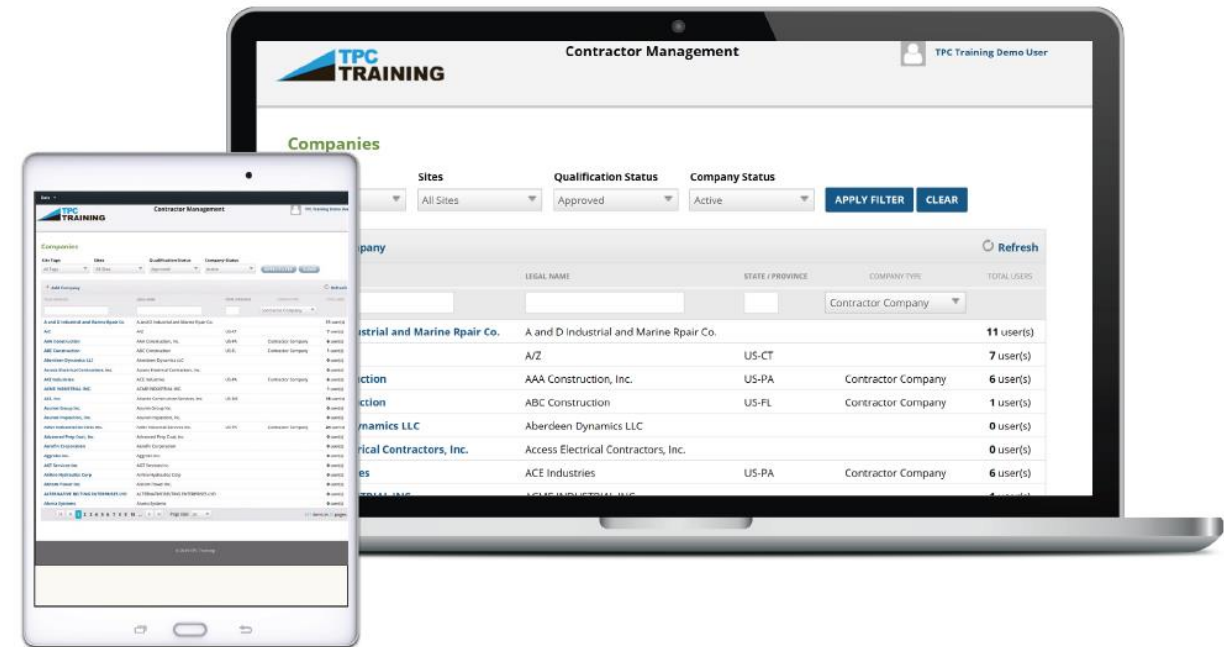

Workforce Management / EH&S Solutions

- Employee & Contractor Management

- Access Management
- Worker Record Management
- Orientation Training
- Document & Task Management

- Incident Management

- Auto-Notification Management
- Comply with Injury Reporting Regulations
- Drive Completion of Corrective Tasks

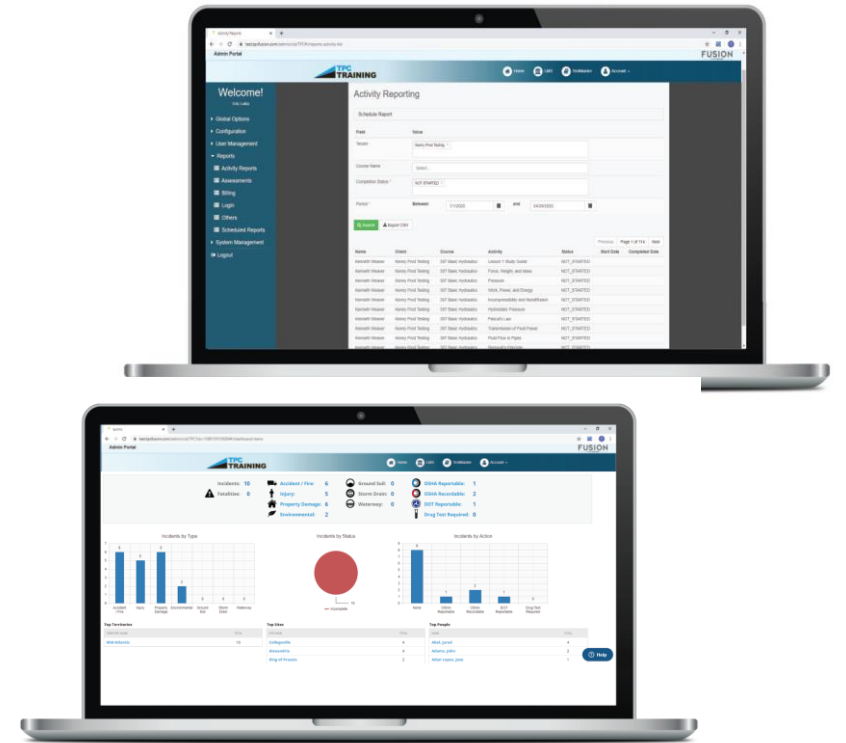

FUSION: A Workforce Management Solution

TPC Fusion is a comprehensive, user-friendly software application that integrates our suite of workforce management solutions for the administration, documentation, tracking, reporting, assessment, and delivery of training programs and performance and compliance solutions.

TPC Fusion Delivers

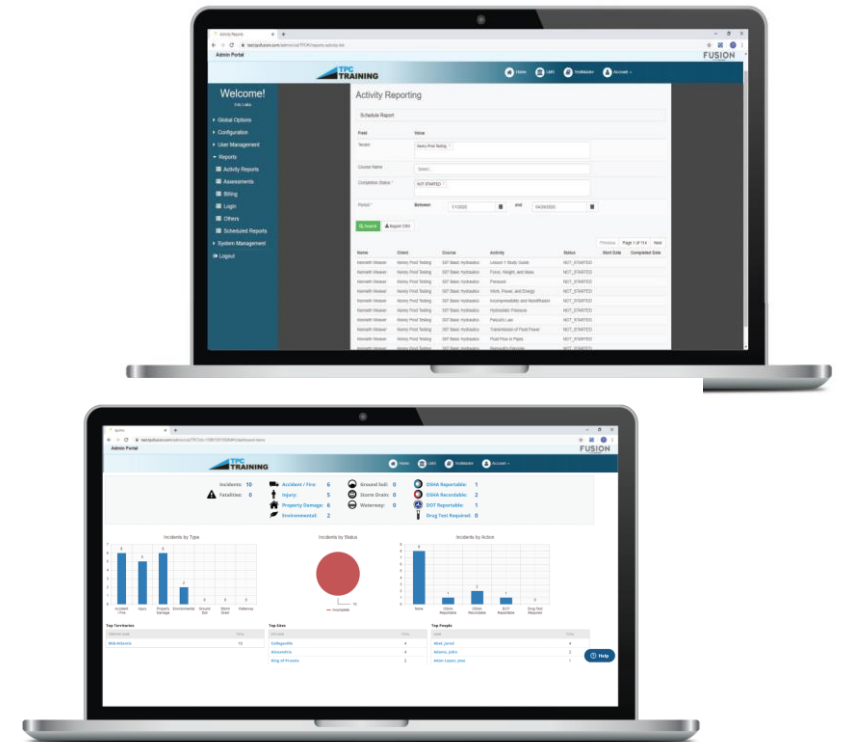

- More than 1,000 detailed technical training lessons from our proprietary library
- Best-in-class learning management features
- User-friendly intuitive design for both administrators and employees
- Integration capabilities to build your own courses and content
- Customized test-building using Testmaster™, to create and deliver your own assessments
- TPC's EHS workforce software management solutions including mobile forms, skills verification, contractor management and employee safety and performance
- Centralized platform inclusive of your HRIS system

FUSION: A Workforce Management Solution

The Results

When you adopt and integrate TPC Fusion to streamline your workforce training management, you experience peace of mind knowing you are providing your workforce with more than just training; you are improving their livelihood by advancing their careers, which increases retention, expedites knowledge transfer, and enhances safety and performance—ultimately, leading to the overall success of your company.

Questions?

- If you'd like to learn more about how to use software to drive the growth of your workforce, TPC Training can help!
